

CLAUDE CODE · v2.1.247

The agent files bugs on itself

SendFeedback drafts a report when
Claude messes up

HOW IT WORKS

- Something breaks, Claude drafts a report
- Saved locally, nothing is sent
- `/feedback` opens the draft queue
- You edit and submit it yourself

TAXONOMY

16

failure modes

THE MODEL LABELS ITS OWN MISTAKES

ON THE LIST

- overconfidence — confidently wrong
- stopping_short — handed work back
- subagent_overspawn — too many agents
- tone_or_preachiness — got preachy

HEADS UP

Transcript defaults to yes,
and Anthropic keeps it
for five years.

docs · data-usage

READ THE DOCS

**First tool where an LLM
keeps a log of
its own failures**
