Local dictation on your Mac

FluidVoice — free, nothing leaves the
device

WHAT IT IS

- Hotkey, speak, get text
- Speech recognized on device
- Fluid-1 model cleans it up
- GPLv3, installs via brew

BUT THE UX

- Hotkey fires on its own
- Microphone drops mid-sentence
- Short phrases vanish silently
- Pasting breaks in some apps

PACE

56

open issues

a release every 5-7 days

TELLING

It ships a button
to roll back a version

and you will need it

TAKE A LOOK

**Right idea,
execution not there yet**
