

GITHUB · 57.6K STARS · AGPL-3.0

A tracker you can hand to an agent

Plane — the open-source Jira and Linear
alternative

WHAT'S INSIDE

- Work items, cycles, modules
- Views and wiki pages
- Analytics and an intake queue
- Self-hosted or cloud

MCP SERVER

204

operations packed into 30 tools

THE AGENT FILES AND CLOSES ISSUES ITSELF

THE HONEST PART

- 13 containers in docker compose
- ~200 lines of ENV variables
- 4 GB RAM is the floor, not comfort
- SSO and epics are paid Commercial

TAKEAWAY

A tracker stops being
a place you visit
by hand

it becomes an API for your agent

TRY IT

Self-host Plane on your own box
