METR · ANTHROPIC ASSESSMENT

The audit that got its evidence redacted

An independent review the audited party may edit

THE HEADLINE NUMBER

1.9x

faster model capability progress since October 2025

95% CI 1.5-2.8x — two years of progress in one

HOW IT WAS MEASURED

- Slope of the capability curve, not surveys
- Compute growth ruled out as the cause
- METR attributes ~80% of it to AI itself
- Self-reports hit 12x: 'very loose evidence'

ABOUT THAT INDEPENDENCE

- Anthropic redacted the most telling evidence
- The compute audit was cancelled midway
- Data flowed through two Anthropic staff
- Claude wrote much of the paperwork

STRAIGHT FROM THE REPORT

"The public has to rely on METR's judgment much more than would be ideal"

metr.org, November 5, 2026

TAKEAWAY

Independence ends where the audited get edit rights
