TELEGRAM macOS · BETA 12.10.283300

Live HTML inside the chat bubble

HTMLBubbles — HTML/CSS/JS rendered as a message

FOUND IN THE BUILD

64

demo scenarios

oduct cards, boarding passes, todo lists, charts, che

WHAT THE SANDBOX DENIES

- document, window, fetch
- network and remote images
- iframe, canvas, video, audio
- localStorage and sockets

SCRIPT BUDGET

50 ms

per single call

er second and 16 timers — overrun falls back to sta

WHY IT IS NOT A MINI APP

- Mini App — a window above chat
- HTMLBubble — inline in the feed
- no WebView, no network at all
- unannounced, macOS prototype

MORE

Someone else's JS in a message —

both a bug and a feature
