ANTHROPIC · FABLE 5.2 / MYTHOS 5.2

Two models, one set of weights

The difference is the safety layer, not the architecture

ANTHROPIC'S OWN WORDING

"The same underlying model"

anthropic.com, November 9, 2026

THE NUMBERS

- $8/$40 per 1M tokens — 20% cheaper
- 1M context, up to 128K output
- Generation up to 30% faster
- Fast mode: 2.5x speed at 2x price

THE CATCH

- Fable filters cybersecurity and biology
- If flagged, a weaker model answers
- Mythos: same weights, no brakes
- Access by application, not an API flag

THE PRICE OF THE FILTER

10.2%

more vulnerabilities found on CVE Rediscovery

Mythos over Opus 5.5 — same weights as Fable

TAKEAWAY

The ceiling is no longer the weights.

It is the allowlist
