

GITHUB · 31K STARS

DeepTutor — an AI tutor from HKU

An agentic workspace for lifelong
personalized learning

WHAT IT DOES

- Chat, problem solving, quizzes
- Research and visualization
- One agent, one shared memory
- RAG: LightRAG, GraphRAG, Obsidian
- Subagents: Claude Code, Codex

HOW MEMORY WORKS

- Raw interaction traces
- Then distilled summaries
- Then an evolving learner profile
- The profile stays editable by hand

MY DIY VERSION

23

HTML lessons with widgets

MISSION and NOTES in plain markdown

TAKEAWAY

Sometimes 300 lines
of markdown do the job
of a 31k-star framework

Apache-2.0 · +10.8% personalization

TRY IT

```
pip install -U deeptutor
```
