

GITHUB · APACHE-2.0

An agent harness as a library

Strands harness by AWS: three lines to a
working agent

BATTERIES INCLUDED

- shell, file read and edit, web access
- subagents with bounded delegation
- memory as markdown in `.agent/memory`
- skills loaded from plain `SKILL.md`

CLAIMED SAVINGS

-28%

token cost versus other harnesses

their own numbers, six benchmarks

NOT NAILED TO A VENDOR

- 13 providers: Bedrock, OpenAI, Gemini
- Anthropic, ollama, litellm — one line
- one effort knob, off through max
- runs in your process, no control plane

THE HONEST LIMIT

8.6k stars are the SDK's
16-month history. The harness
itself is 12 days old, at 0.1.2.

MORE

**Someone else's batteries,
but they come out**
