AutoClip — cuts long video into shorts

FROM THE DOCS

7.5 min

1h43m interview → finished clips

runs locally, no cloud SaaS required

THE PIPELINE

- yt-dlp pulls the source by URL
- Whisper locally or a cloud ASR
- An LLM scores segments for virality
- FFmpeg: 9:16, burned subs, cover

WHAT IT COSTS

- You need long footage to begin with
- macOS build is Apple Silicon only
- Local models want decent hardware
- No voice-over, no avatar, no synthesis
