One endpoint instead of 10 keys

OmniRoute — a local AI gateway

WHAT IT IS

- OpenAI-compatible /v1
- 290 providers behind it
- Fallback cascade on quotas
- Prompt compression: RTK + Caveman

SETUP

1

line: npm i -g omniroute

SERVER ON LOCALHOST:20128

THE HONEST BUT

- Keys sit in plaintext by default
- Encryption is opt-in and manual
- Free-tier stacking risks ToS bans
- Compression is lossy and silent
