ADDY OSMANI · AGENT-SKILLS

A table of excuses for your agent

25 skills across the full cycle: spec → plan → code → ship

SOUND FAMILIAR?

It skipped a step
and wrote a convincing
paragraph on why

every autonomous run

WHAT IS INSIDE

- 25 skills across 6 SDLC phases
- 9 commands: /spec /plan /build /ship
- Claude Code, Cursor, Codex, Gemini CLI
- MIT, installs with a single npx line

THE CORE TRICK

- Anti-rationalization in every skill
- A table: excuse → why it is false
- "Too simple for a spec" is pre-listed
- Name the excuse and it stops working

ONE CAVEAT

0.6.15

their own gate printed the secret it found

And linters returned exit 0 on critical findings

TAKEAWAY

A gate that does not gate is just another excuse
