

CLAUDE CODE · v2.1.295

A broken hook no longer waves it through

onFailure: "block" — one field in settings.json

HOW IT USED TO WORK

exit 1

did not block

conventional Unix failure code counted as a non-blocking

WHAT COUNTS AS A FAILURE NOW

- the script is missing
- exit code other than 0 or 2
- timeout, 600s by default
- non-2xx HTTP or broken JSON

WHERE THE GAP REMAINS

- Stop and SubagentStop
- TaskCompleted, TeammateIdle
- background async hooks
- mcp_tool, prompt, agent types

I CHECKED MY OWN CONFIG

10

hooks

of them guards on PreToolUse — not one had the fi

MORE

**A guard that can fail
quietly is not a guard**
