

CLAUDE CODE

/doctor

A health check for your setup

WHAT ACTUALLY BREAKS

- Two parallel installs
- A broken PATH
- An invalid settings.json
- One MCP in two scopes

TWO DIFFERENT COMMANDS

- `claude doctor` — from the shell
- Read-only, 10 lines of facts
- `/doctor` — inside a session
- A skill that fixes on key f

WHAT IT CATCHES

- Leftover old installs
- Unparseable settings files
- Skills and MCPs eating context
- Slow hooks

THE HONEST BUT

It got smarter
and stopped being
instant

since v2.1.205 · it now spends model tokens

TAKEAWAY

**Run /doctor
before you google**

code.claude.com/docs/en/commands
