ZIG · NOV 2

A browser that renders no pixels

Lightpanda — headless, built from scratch in Zig

VENDOR BENCHMARK

4.8s

933 pages, 25 workers

headless Chrome: 46.7s and 2 GB

WHAT IS INSIDE

- DOM, own layout, JS on V8
- No graphical rendering at all
- Speaks CDP over WebSocket
- Puppeteer scripts move by URL swap

WHAT IT COSTS

- No WebGL, canvas, Service Workers
- Web Platform Tests ~80% of Chrome
- Own fingerprint: Cloudflare sees a bot
- At 100 processes the speed edge is gone

REPO

40.7k□

AGPL-3.0, 1.0 shipped in October

wrap it in a service — open your code

TAKEAWAY

Speed bought not by optimization, but by features thrown out
