

CLAUDE CODE 2.1.277

Claude Code now reads AGENTS.md

A fallback, not a merge

HOW IT WORKS

- no CLAUDE.md in the tree, AGENTS.md is used
- switch the mode in /config
- a read-both option is available
- nested files attach when Claude reads them

THE STANDARD IS EVERYWHERE

27%

of the top 1000 GitHub repos ship one

Codex, Cursor, Copilot, Zed, Aider, Gemini CLI

THE QUIET GOTCHAS

- CLAUDE.local.md kills the fallback
- a global ~/.claude/CLAUDE.md does not
- symlinks break Edit and Windows clones
- an @AGENTS.md import is the safe path

THE WAIT

5183

thumbs up on the feature request

12 months from issue to release

THE CATCH

MORE

**A file on your disk
should not ask a server**
