THE PROBLEM

45M

tokens of noise

FEEDING RAW FOOTAGE TO AN AGENT

HOW IT WORKS

- ElevenLabs Scribe gives timecodes
- Every take packed into 12 KB
- The agent reads it, picks the cuts
- Waveform view only where unclear

OUTPUT

- final.mp4 and edl.json
- The edit is reproducible
- 42 files and one SKILL.md

NEARBY

OpenMontage generates
a video from nothing.
video-use only
cuts yours.
