A spy satellite in your browser

God's Eye View — except the data is
real

WHAT'S INSIDE

- A photorealistic 3D globe
- Planes, ships, satellites
- NASA fires and ~800 CCTV feeds
- 13 live layers in one scene

NO API KEY NEEDED

10 / 13

layers run out of the box

THE REST ARE FREE SIGN-UPS

WHAT YOU CAN DO

- Click a plane, fly its cockpit
- Night vision and thermal
- Fire → the nearest live camera
- By voice: draw a route, fly it

THE CATCH

- No hosted demo, npm run dev only
- A Google Map Tiles key is required
- The scene runs 15-30s behind
- No fresh satellite imagery at all

GO LOOK

**The signals were
always public**
