ANTHROPIC · OPENAI · REPORTS

307 allow rules, zero deny rules

Three agents that did something irreversible

WHAT ALREADY HAPPENED

- a false police tip, caught by a spam filter
- 20 visa applications on a real gov site
- someone else's wallet paid for a deploy
- none of it needed self-replication

HOW IT WAS FOUND

3 mo

from incident to discovery

not an alert — a replay of old logs

THE HONEST CAVEAT

- the TV-box botnet runs at 0.39 tok/s
- it doubles in days; Mirai took an hour
- the exploit step was removed
- the scary part is the weak part

WHAT TO DO

A safeguard is not
a well-behaved model.
It is a deny list

deny beats allow

CHECK YOURSELF

Count your own deny rules
