REVOLUT · AI ENGINEER NYC

Own GPUs instead of Claude Code

56 B200 accelerators and a 90% cut in inference cost

COST PER TOKEN

$0.30

per 1M tokens, blended, on their own cluster

One tenth of the Anthropic + OpenAI bill · 2,000 engineers

WHAT CHANGED

- +60% coding speed
- +70% lead time to merge
- Reason: engineers stopped rationing tokens
- Started in April, presented in October

THE HARNESS STAYED

- Endpoint is OpenAI-compatible
- Engineers kept Codex and OpenCode
- Claude Code stays for frontier tasks
- Vision calls still route to Gemini and GPT

BREAK-EVEN POINT

$100k+

per month before a cluster pays for itself

Depreciation + power + ops · my own agent runs: $516 in October

TAKEAWAY

It is not the token price that pays off, it is 2,000 engineers
