

CLAUDE CODE · v2.1.273

**Your agent
didn't fail.
It finished.**

Three fixes for autonomous runs

WHAT BROKE

- subagent finished the job
- parent marked it failed
- result was dropped silently
- cause: a missing usage block

WHAT GOT FIXED

- no usage or model id is not a failure
- stream-json keeps the tail
- backgrounded tasks deliver reports
- auto-compact counts honestly

COST OF THE BUG

7 of 16

auto-compactions on advisor turns

at a real 82-100k tokens of context

WHO CARES

- you run agents in the background
- you orchestrate subagents
- you live on the SDK and headless
- your reports go missing
