MarkItDown:

office files to Markdown

Microsoft · MIT · Python

THE PROBLEM

Your model needs text.

Your data lives in
docx, xlsx and pdf.

one library per format, one dependency hell

WHAT IT EATS

- PDF, Word, Excel, PowerPoint
- Outlook .msg, EPub, ZIP recursively
- A YouTube link becomes a transcript
- File type detected by Magika, not extension

HOW TO RUN IT

- `pip install 'markdown[all]'`
- `markdown file.pdf -o out.md`
- `claude mcp add markdown`
- The MCP server exposes one tool

THE HONEST CATCH

0.00

PDF headings score

TABLES 0.27 VS 0.88 FOR DOCLING
