

GITHUB · 40.5K STARS

A diagram you can actually verify

Archify · an agent skill · MIT

THE PROBLEM

- Overlapping arrows
- Clipped labels
- No proof it matches your system
- Nothing to check it against

HOW IT WORKS

- The agent never draws SVG by hand
- It authors a typed JSON IR
- A Node compiler renders the HTML
- A validate to deliver gate

AUTHOR'S BENCHMARK

66.7%

usable diagrams on first pass

10 OF 15 RUNS · THREE MODELS

THE LESSON

Layout is the
product, not CSS

from a failed Mermaid experiment

TRY IT

**Verifiable beats
beautiful**
