

CNN · SEP 18, 2026

A chatbot wrote the intel report

The aircraft were already airborne

WHAT HAPPENED

The bot fused open sources with
secret signals intelligence:
nuclear components on board.

TWO PASSES, ZERO CHECKS

- first prompt invented the conclusion
- second formatted it as a real report
- the report spread across commands
- an interception was being prepared

SCALE OF ADOPTION

1.7M

users on GenAI.mil

and 100,000+ custom agents

WHAT IT MEANS

- no single verification standard
- report format borrows real trust
- caught by checking the sources
- and it was not an isolated case

MORE

**A polished format
is not evidence**
