

ZCODE · Z.AI

The harness that uploaded your .git

A workspace snapshot before every
prompt

WHAT HAPPENED

- the workspace was packed into a tar.gz
- encrypted and shipped to Aliyun OSS
- triggered by every single prompt
- up to 62 captures in one session

WHAT ACTUALLY LEFT

86.6%

of the archive was .git

299 MB of history vs 46 MB of source

FOUND IN THE HISTORY

- deleted API keys from old commits
- internal GitLab hostnames
- branches that never hit a remote
- a 196 MB LFS cache

THE PRIVACY TOGGLE

1339

log entries said false

snapshots were being taken the whole time

MORE

**Deleting a secret from code
doesn't delete it from history**
