

GITHUB · 31K STARS

The AI Agent engineering book nobody in the US read

10 chapters, 96 hands-on labs,
Apache-2.0

CORE IDEA

Agent =
Model + Harness

the thread running through all 10 chapters

WHAT IT COVERS

- Context engineering and KV-cache
- Memory, RAG, knowledge graphs
- MCP and three classes of tools
- Eval, post-training, multi-agent

A CASE FROM CHAPTER 2

2x

the monthly inference bill

NE CURRENT TIME LINE IN THE SYSTEM PROM

NOT ANOTHER AWESOME LIST

- 321 pages and 132 diagrams
- 96 reproducible experiments
- An honest log of what failed
- Free PDF and EPUB in releases
